Mondli Mokoka

--

Johannesburg, Gauteng, South Africa

Summary

Dynamic and driven human with a background in Information Technology in Business Systems. Successfully navigated a comprehensive ICT learnership program. Thrived as a Software Developer Intern at Unizmo and later transitioned to a role as a Trade Development Representative at IMS Ventures.

Enhanced my skill set through a Java Development program, complementing a solid academic foundation in Information Technology in Business Systems.

My pursuit of knowledge, coupled with a tenacious spirit and innate curiosity, fuels my desire to contribute meaningfully to organizations in the IT landscape.

Lettuce connect... Let's connect and explore opportunities for collaboration.

Experience

CodSoft

1 month

Android App Developer

June 2024 - Present (1 month)

Engaged in a remote internship focusing on Android app development.

Utilized Java, Android Studio, and various Android libraries.

Performed code reviews and debugging to ensure optimal app performance.

February 2024 - March 2024 (2 months)

South Africa

Engaged in a remote internship focusing on Java application development. Took part in designing, developing, and testing of Java-based applications. Utilized core Java concepts, Object-Oriented Programming (OOP), etc. Gained experience with Git for version control.

Unizmo

Software Engineer/Developer Intern

March 2023 - May 2023 (3 months)

Gauteng, South Africa

>Developed cross-platform applications using Flutter and Dart programming language, enabling the creation of both web and mobile applications with a single codebase.

>Collaborated with a cross-functional team to build and enhance web and mobile applications in preparation for code reviews solely for research and learning purposes.

>Demonstrated proficiency in utilizing Flutter's widgets and responsive design principles to ensure seamless user experiences across various devices and screen sizes.

>Leveraged Dart's strong typing and asynchronous programming features to optimize application performance and maintainability.

>Made an attempt to tackle both front-end and back-end development using Visual Studio 2019 when tasked with the development of the business portal, gaining valuable experience in working across different aspects of web application development.

Education

IIE Rosebank College

bachelor of information technology in business systems, Information Technology · (February 2020 - December 2022)
